SUMMARY

Dynamic and culturally diverse graduate engineer with a decade-long career in freight logistics. Purposeful career changer driven by a passion for self-development and a keen interest in IT technologies. Finds joy in implementing diverse technologies to solve problems and deliver effective solutions, particularly enjoying the process of crafting high-level functionalities that not only work effectively but also provide a profound sense of satisfaction for users interacting with the projects she undertakes. Aims to contribute as a dedicated software developer to a team that promotes continual learning and the refinement of coding skills.

PROFESSIONAL EXPERIENCE

FULL STACK WEB DEVELOPMENT PROGRAM PARTICIPANT, CareerFoundry,
Hamburg, Germany

May 2023 – Nov 2023

- Intensive, project-based online training program focusing on HTML, CSS, JavaScript, React, Angular, and the MERN stack (MongoDB, Express, React, Node.js).
- Designed and developed a variety of web applications.

PROJECTS:

- Crafting a small web application using HTML, CSS, and JavaScript to retrieve data from an external API.

- Tackling the server-side component of the myFlix movie web application, serving as the backend for managing and providing access to a vast array of movie information.

- Building the myFlix React app, utilizing the MERN stack, which provided a comprehensive understanding of full-stack development.

- Creating a serverless, progressive web application named Meet App, powered by React and integrated with the Google Calendar API to fetch upcoming events.

- Developing a mobile chat application using React Native and Expo.

- Building an Angular App that interacts seamlessly with existing server-side code and a database through REST API endpoints.
